

JOB ANNOUNCEMENT

Health Economist

Lisbon, Portugal

Exigo is a Portuguese consulting company that started its activity in 2001. The core business of Exigo has been national and international consulting services for the health sector, mainly in the field of health economics, epidemiology and mathematical and statistical analysis. Exigo disposes of a young, dynamic and multidisciplinary team that combines a high level of theoretical and practical knowledge. This allows us to respond to the needs of our clients in an impartial and rigorous way.

The **Quantitative Methods Department** at Exigo intervenes in the majority of projects developed by the company, contributing to their precision and rigor. The department is constituted by health economists, mathematicians and statisticians with different levels of education and experience. At the department, we give value to solid theoretical knowledge and its application in solving our clients' everyday problems.

To support a growing demand, we are looking for a **health economist** to join the team.

Profile/qualifications:

- 1) Master's degree (or higher) in economics, mathematics, statistics, pharmaceutical sciences or related field;
- 2) A good understanding of fundamental concepts of health economics and statistics;
- 3) Experience conducting economic evaluation of medicines and health technologies;
- 4) Proficiency in using Excel/VBA;
- 5) Ability to work on several projects simultaneously and in a team environment;
- 6) Solid problem solving capabilities;
- 7) Excellent communication skills in English (oral and written).

Experience with statistical and modelling software are considered a plus.

EXIGO CONSULTORES

Cogent & Accurate Solutions

Job description:

- a) Use health economic evaluation (cost-effectiveness analysis, budget impact models, etc.) to synthesize qualitative and quantitative data to support medical/health decision making;
 - b) Assist with other quantitative projects under the supervision of an experienced team;
 - c) Prepare reports, manuscripts, posters and presentations;
 - d) Continuously review the existing literature on quantitative methods applied to the field, to keep abreast of the latest developments and identify possible future research directions.
-

Deadline for job applications: July 31th, 2017.

Candidates should send a **motivation letter** and their **curriculum vitae** to the email: **recrutamento@exigoconsultores.com**. Further information can be obtained through the above email or by phone (+351) 21 896 71 58/9.
